

Bay Area Building Solutions

Design-Build General Contractor

Craig Verville

Project Manager

RESPONSIBILITIES

Craig is responsible for all on site management on any given construction project. These oversights include subcontract procurement, project purchasing, subcontractor relations, material scheduling, architect liaison, budget monitoring and project specific accounting. Craig is also directly responsible for maintaining project specific communications with the owner throughout the construction process. Craig and the project superintendent are ultimately responsible for insuring a safe, profitable, high quality finished project.
